

INTELLIGENT MAIL PROCESSING

THE PERFECT SOLUTION

PS1000

**IT'S ABOUT STREAMLINING MAIL PROCESSING AND ADAPTING TO ALL YOUR MAILING NEEDS**

Process your high volume jobs day in and day out with Hasler's powerful PS1000 Folder/Inserter. The PS1000 is designed to maximize throughput and offer an unsurpassed level of productivity, especially during rush times. Its uniqueness comes from an insertion speed of 8,300 envelopes per hour combined with the ability to maintain that critical speed for jobs with multiple page counts without a noticeable speed reduction. And its ability to switch between multiple production mailing jobs in no time keeps you up and running. Thanks to its insert and folding station, high-speed design, and increased input and output, the PS1000 stands as the perfect solution for your heavy volume productivity requirements.

The high-capacity sheet feeder and vertical envelope reception stacker enables you to maintain the highest level of efficiency and productivity – even for your most demanding mail processing jobs. By selecting the Automatic Job Setup function on the easy-to-read touch screen display, the PS1000 automatically switches to the processing of new jobs in seconds, saving invaluable setup time on new and repeat orders. In addition, as your company grows, the modular design means your future job needs will be satisfied simply by adding the right module at the right time.

SECURE DOCUMENTS AND ENSURE ACCURACY

Each feeder provides automatic calibration of any processed item, supports OMR 1D/2D barcode reading options, and generates detailed identification files. Job audit trail reports ensure all documents have been correctly processed throughout the system for maximum mailing integrity.

ENHANCE SPEED AND EFFICIENCY

Select the Automatic Job Setup function and the PS1000 automatically programs your work in seconds, saving you valuable setup time on new

and repeat jobs. For example, change from a #10 envelope to a 6" x 9 1/2" in under two minutes. Also, a highly efficient PC interface lets you run every application with a touch of your screen. And the PS1000 can report on any aspect of every application, while validating that your documents have been processed correctly.

HANDLE HEAVY STOCK ITEMS WITH EASE

The PS1000 insert feeders easily handle documents up to 5/32" thickness, allowing you to process a wide variety of brochures, booklets and other collateral.

PS1000 SPECIFICATIONS

MACHINE SPECIFICATIONS

- Length x Height x Depth: 118" x 60" x 134"
- Weight: 2025 lbs.

(Above based on a four-station configuration)
